

VACANCY ANNOUNCEMENT

The AgriFin Program will operate in four African countries (Kenya, Tanzania, Nigeria and Ethiopia) utilizing a market ecosystem approach, working with carefully selected partners to build sustainable models, where farm and crop management tools and financial services are "bundled" in affordable, unified platforms on mobile phone channels to promote mass uptake commercially. The program involves three interrelated components that seek to address low farmer productivity and capability and improve institutional ability to deliver appropriate products and build ecosystems to drive scale. We work with farmers, banks, mobile network operators, MFIs, research institutes and other ecosystem players in well-defined partnerships to sustainably bundle services, leveraging the offer and outreach of all partners, while increasing the range of services, access points and value for farmers. The program works with partners to identify, prototype, test and scale successful mobile-enabled services for smallholders, with a key focus on expanding access to financial services, using a rapid iteration approach to product development and client-centric design techniques.

We are presently looking for a committed and dynamic individual to take up the position of **Driver/Admin Assistant**.
